

This special SAFETY Paper Ripper with spring-loaded hook guard was developed in close coordination with a renowned paper mill. Designed to remove residual paper layers from roll cores, reject rolls, mandrels, etc. "GS-TESTED FOR SAFETY". Complete with Ripper Hook made of forged round bar stock with a ground bevel edge for use with thick paper grades. Complete with wall mounting bracket.

The setting angle of the blade towards the material affects the cutting depth, for which purpose an adjusting screw is provided.

Installed Blade:

No. 753
Ø 8.00 mm

This Blade may also be used:

No. 754
2.00 mm

The grinding angle of the hook point bites into the thickest paper layers.

The hook guard snaps back into "Point SAFE" position the instant point contact is lost!
