Report # K-352038-01-R00

Samples Received: Samples Tested: Jan-16-18 Jan-31-18

# **Test Report**

Kinectrics Inc., 800 Kipling Avenue, Unit 2 Toronto, Ontario, Canada Tel: 416-207-6000, www.kinectrics.com

### Tested for

Polison Corporation 282 Heping Second Road, Qianzhen Dist. Kaohsiung 80651 Taiwan

# **Contact information for item tested:**

Polison Corporation David Cheng david@polison.com +886 7 7616842

#### Test item description

Polison Corporation, Faceshield;

Lens: Model FCA8, Polycarbonate, 1.6 mm thickness, Grey;

Hard Hat: Model HR36; Chin Cup: Model C3, ABS; Bracket: Model A8, ABS;

### **Reference Standard**

ASTM F2178-17b

Standard Test Method for Determining the Arc Rating and Standard Specification for Eye or Face Protective Products

<u>Test Parameters:</u> Test current: 8 kA Number of samples analysed: 20

Arc Gap: 30 cm

Distance to Fabric: 30 cm Incident Energy Range: 6 to 17 cal/cm<sup>2</sup>

Arc Rating, ATPV = 11 Cal/cm<sup>2</sup> Heat Attenuation Factor, HAF = 87%

No variations to standard method noted. Samples tested as received.

### **Test Summary**

The Arc Rating of this material is intended for use as part of a flame resistant garment or system for workers exposed to electric arcs. The test result is applicable only to the test item as described; other fiber blends, weaves, finishing or dye may have different protection level. The test articles are tested as received; no test is done to validate the fiber content or composition. The Arc Rating was calculated based on the data obtained and analysed in accordance with the latest version of the applicable standards. The individual test sheets, graphs, photographs of the samples and video of every test are provided in digital format to the Client for review.

The arc testing performed to the above mentioned Standard is accredited by the Standards Council of Canada (SCC) to conform to the requirements of CAN-P-4E (ISO/IEC 17025:2005). Accreditation by the Standards Council of Canada (SCC) is a mark of competence and reliability recognized throughout the world.

Kinectrics Inc takes reasonable steps to ensure that all work performed shall meet the industry standards as set out in Kinectrics Inc.'s Quality Manual, and that all reports shall be reasonably free of errors, inaccuracies or omissions. KINECTRICS INC. Report #

K-352038-01-R00

Determination of ATPV by performing logistic regression on the panel burn response as indicated in Summary Table

Test Performed in accordance with: ASTM F2178-17b

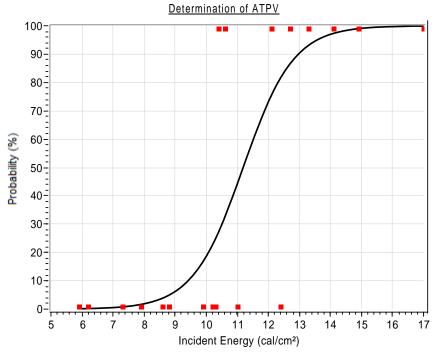

# **Fabric Description:**

Polison Corporation, Faceshield;

Lens: Model FCA8, Polycarbonate, 1.6 mm thickness, Grey;

Hard Hat: Model HR36; Chin Cup: Model C3, ABS; Bracket: Model A8, ABS;

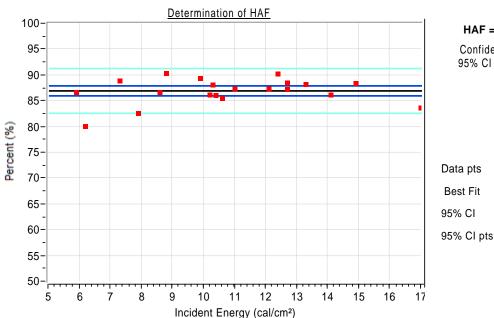

ATPV = 11 cal/cm<sup>2</sup>

Probability	Ei
5%	8.8
10%	9.4
20%	10.1
30%	10.5
40%	10.9
50%	11.2
60%	11.5
70%	11.9
80%	12.3
90%	13.0

(Note: ATPV is reported to nearest integer for ratings above 10 cal/cm<sup>2</sup>)

Total points analyzed = 20 Points above Stoll = 9 Points above mix zone = 6 Points below mix zone = 9 # Pts within 20% = 11 # Pts in mix zone = 5

HAF = 87 % Confidence Intervals 95% CI = 86.0, 88.0

Data pts Best Fit 95% CI

#### Date: Jan-31-18
