FIRE IN ELECTRIC CARS

Usable in various situations

Follow step 1-3. After the fire blanket has been placed tight to the ground, wait 2-3 minutes and listen. If you can hear strong fuzz sounds about every 3-15 seconds, you have a thermal runaway. Leave the fire blanket on until the sound stops. This is a small fire that goes from cell to cell. The fire blanket will prevent the small fire from spreading elsewhere in the car.
