

S856 - Steel core cable lockout device
Ideal for valve & other general lockout applications

S866 - Nylon core cable lockout device
Ideal for electrical applications

Retractable Cable Lockout Devices for a Variety of Applications

Rugged Zenex™ Thermoplastic Housing

Stores unused cable, making the device more manageable – whether in use or in storage

Ergonomic Take-Up Wheel

Retracts the cable. Deep pockets allow for easy operation, even with gloves

Color-Coded Labels

Color-coded labels allow users to quickly identify the devices designed for general or electrical applications

Control Lever

When closed, tension on the cable can only be increased. Internal ratcheting mechanism allows users to add tension, even after safety padlocks have been applied. Opening the control lever releases the lockout

Contoured Design

Allows stacking of multiple devices for easy storage and transportation

Cable Release Button

With the control lever open, pressing this button releases the cable after the lockout is complete

Cable Clip-In Pocket

Cable snaps into pocket and remains in place until control lever is opened and cable release button is pushed, preventing premature removal

Cable

9-foot (2.7m) color-coded cable for easy identification and improved visibility in the work environment. Red steel core cable for general applications. Yellow nylon core cable for dielectric applications

Lock Holes

Four 3/8in (10mm) lock holes allow for safety padlocks and hasps to secure the device during lockout

Adjustable Cable Lockout Devices with Cable Management System

	S856	S866
Housing Material	PC-PBT Thermoplastic	
Cable Color	Red	Yellow
Cable Core Material	Stranded Steel	Nylon
Cable Sleeve Material	Thermoplastic Polyurethane	
Cable Length	9ft (2.7m)	
Cable Diameter	1/8in (3.3mm)	
Cable Tip Material	Chrome-Plated Stainless Steel	Stainless Steel with Black Phosphate Finish
Cable Tip Diameter	3/16in (4.8mm)	
Lock Hole Diameter	3/8in (10mm)
